Global Interdependence Issues

China in recent months has cooperated increasingly with the world community on complex multilateral issues. The visits of Premier Hua Guofeng to Europe and Vice Premier Deng Xiaoping to Japan and the United States demonstrate a willingness to expand China's cooperative ties with other governments.

We should initiate and maintain a dialogue with China on a number of global issues in order to enlist Beijing's future cooperation. We want to impress upon Zhang our willingness to work closely in international fora addressing these issues.
